

IN THE CLAIMS:

1. (Previously presented) A method for facilitating electronic commerce through a network, said network comprising at least one server computer capable of communicating with a browser system located at a remote client computer, said method comprising:

5  
ENTER  
CA 7/12/04

(a) receiving, by said at least one server computer, a first request for a first suggested order, said first suggested order comprising a first two or more suggested products or services of a plurality of products or services, a first suggested recurrence for each of said first two or more suggested products or services and first suggested quantities for each of said first two or more suggested products or services, wherein said first suggested recurrence associated with a first of said first two or more suggested products or services may be different than said first suggested recurrence associated with a second of said first two or more suggested products or services;

10

(b) generating a first profile, by said at least one server computer, said first profile comprising a computer readable representation of said first suggested order; and

15

(c) causing, by said at least one server computer, said first suggested order to automatically recur one or more times according to said first suggested recurrence based on said computer readable representation, by signaling a marketing system associated with said at least one server to fulfill each of said first two or more suggested products or services according to said associated of said first suggested recurrence.

- 20
2. (Previously presented) The method of Claim 1, further comprising:

25

(d) confirming acceptance of said first suggested order prior to said generating.

3. (original) The method of Claim 1, wherein said plurality of products or services are associated with a multi-level marketing system.
